ACTACC Annual Scientific Meeting and AGM - Cardiff 2024

Message from the Organiser:

Please join us at the Association of Cardiothoracic Anaesthesia and Critical Care Annual Scientific Meeting in the Welsh capital city Cardiff, July 4-5th 2024.

As well as focussing on the current state of the art of Cardiothoracic Anaesthesia and Critical Care, this meeting will also celebrate the 40th anniversary of the association. Distinguished speakers and panel members from areas such as Haematology, Cardiology, Cardiothoracic Surgery, Intensive Care Medicine, Echocardiography as well as experts in both Cardiac and Thoracic Anaesthesia will present their views on a variety of topics such as adult congenital heart disease management, thoracic anaesthesia, patient blood management, cardiothoracic critical care and management of cardiothoracic patients in the perioperative period.

Our popular trainee presentation session and hands on workshops are planned as other attractions of this meeting. Topics are selected to highlight the importance of multidisciplinary teamwork in successful delivery of high-quality perioperative cardiothoracic anaesthesia and intensive care services and will attract delegates from different backgrounds. Consultants, trainees, SAS doctors, perfusionists and nurses are expected to attend. We expect around 200 delegates on each day from UK and abroad.

We really appreciate your support and look forward to welcoming you to Cardiff ACTACC in July 2024.

See you there!

Dr Emily Buckwell
Consultant Cardiothoracic Anaesthetist

Programme

This two day meeting consists of a plenary session in the main auditorium and workshops delivered by a distinguished academic faculty from across the UK and Europe.

The meeting will address the perioperative care of the cardiothoracic surgical patient, promote further education in cardiothoracic anaesthesia and critical care medicine and celebrate 40 years of ACTACC. We are hopeful that the programme will generate significant interest from the multidisciplinary teams that care for these patients; Cardiac and Thoracic surgery, Anaesthesia and Intensive care, Respiratory Physicians, Cardiologists, Perfusion, Nursing and other Allied Health Professionals and provide you unparalleled access to all grades and disciplines invested in the delivery of Cardiac and Thoracic surgical care.
